Product Description

BeRex's BNT01 is a wideband high linearity LNA gain block, based on GaAs material with E-pHEMT process and packaged in a RoHS2-compliant with SOT-89 Surface mount package. It is designed for use where low noise and high linearity are required and features low noise and high OIP3 at wideband frequency. It is internally matched to 50 Ohms without the need for external matching components. All devices are 100% RF/DC tested and classified as HBM ESD Class 1A.
